DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification calls for the pits wherein the data area is surrounded by a non-data area, which is the opposite of what is now claimed in claims 1-20. See figures 4 and 6 A, 6B and page 9, lines 20-26, where the data is the pit/land in the middle of the recording area H/LE. Hence the new limitation in the claims represents new matter.
2. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification calls for the pits wherein the data area is surrounded by a non-data area, which is the opposite of what is now claimed in claims 1-20. See figures 4, 6A, 6B, and page 9, lines 20-26, the data is the land/pit in the middle of the recording

area LE/H. Hence the new limitation is not enabled and would require undue experimentation to make and use the invention.

Allowable Subject Matter

3. Claims 21-22 are allowed.

The following is an examiner's statement of reasons for allowance: the previously cited references taken individually or in combination fails to particularly disclose the clause of the claims that refers to "the step of adapting said forming step to modulate the shape of said mark areas in a predetermined manner." None of the given prior art teaches the order of the recording layer, substrate, and signal generation layer described in the application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.
